IMPROVE YOUR PRODUCTION PROCESSES AND DISCOVER THE REAL POTENTIAL OF YOUR COMPANY

With OEEasy, measure your Overall Equipment Effectiveness (OEE) indicator in your production lines according to quality, performance, and availability for greater results.

Know the performance of your machines, downtime and identify bottlenecks during production, allowing you to analyze real results from any device.

TAKE CONTROL OF YOUR PLANT

Access OEE reports and graphs at anytime, from any device.

Monitor your plant's production process 24/7.

Learn how to increase the performance of your machines and the productive efficiency of your plant.

3 STEPS TO ACHIEVE SMART MANUFACTURING.

1. ACQUIRE

Connect OEEasy to your machines in order to acquire data through sensors or OPC solutions for asset management.

2. PROCESS

Measure your plant's productivity, synthesize the information and receive manufacturing metrics reports with OEEasy.

3. ANALYZE

Analyze charts and indicators as OEE to make effective and efficient decisions.

BENEFITS OF OEEASY:

EASY SETUP

Easily add and customize your machines to view productivity reports and graphs.

WIRELESS CONNECTION

Get data over a wireless connection.

MULTIPLE PLATFORMS

Access your data from any browser (Chrome, Edge or Firefox) on your PC, tablet or other mobile devices.

DATA OF YOUR PLANT

OEEasy transforms data into diagrams and graphs to help you analyze your production.

CLOUD STORAGE

Store your data securely in the cloud. No maintenance required. You can customize the storage size.

24/7 ACCESS

OEEasy will allow you to visualize the reports and status of your plant at any time and from any device. This will make it easier for you to monitor processes.

REAL RESULTS

➤ After using OEEasy for 3-4 months, customers report:

24%

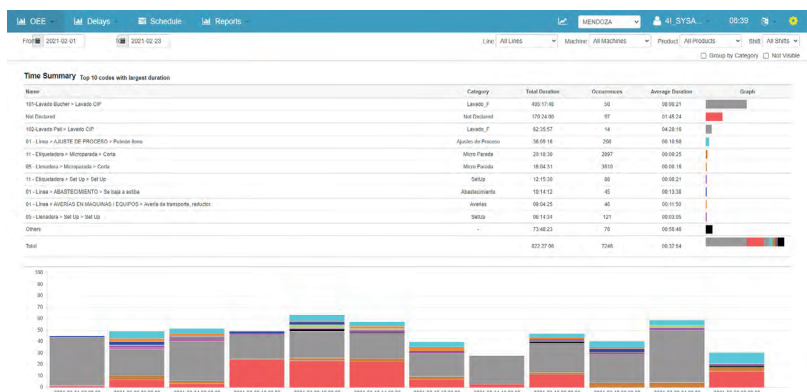

increase in the total effectiveness of the equipment.

16%

decrease in the number of defective products.

10%

increase in production capacity.

NET OPERATING TIME

Identify the real time in which your machines were productive to increase the OEE rate of your plant.

Reduce your carbon footprint and make a positive impact in your community.
